EXECUTIVE SUMMARY

Accomplished Computer Engineer and AI Agent Architect with extensive hands-on experience designing, extending, and deploying autonomous AI agent networks, enterprise Pinecone RAG pipelines, and complex multi-platform automation ecosystems. Built and co-built 30+ native integration nodes in AI MicroMind Core and engineered over 30+ production AI workflows bridging enterprise ERP systems (Oracle, Microsoft Dynamics, SAP, Odoo, Oracle Fusion, Dynamics 365 OData, SQL) with cutting-edge LLMs (OpenAI GPT-4o, Anthropic Claude 3.5 Sonnet, Google Gemini 2.0 Flash).

Architect of the AI MicroMind App featuring the Rebot Bot Framework and Advanced BI & Reporting Tools, empowering enterprise teams to query complex ERP database systems and cloud applications using conversational natural language. Experienced in full-stack mobile application development (front-end & back-end), constructing AI MicroMind MicroApps that integrate any third-party app into the MicroMind ecosystem, and developing custom integration apps across Lark Suite, Bubble.io, Teamwork, Teamwork Desk, ConnectWise, ClickUp, Zoom, Slack, Discord, Telegram, Facebook Messenger, and WAPA (WhatsApp API).

CORE TECHNICAL COMPETENCIES

- Workflow & Agent Frameworks: MicroMind Platform (30+ Native Core Nodes), n8n, LangChain (Expert), LangGraph (Advanced), MCP, Webhooks
- AI Coding Acceleration: Google Antigravity, Claude Code, OpenAI Codex, VS Code AI Suite, GPT-4o, Gemini 2.0 Flash
- ERP & Enterprise Data Systems: Natural Language BI Queries over Oracle, Microsoft Dynamics, SAP, Odoo, Oracle Fusion, Dynamics 365 OData, SQL
- Databases & Vector Search: Pinecone Vector Database, PostgreSQL (LLM-to-SQL & Audit Logger), PGVector, OpenAI Embeddings
- Custom App Dev & Integrations: Lark Suite, Bubble.io, Teamwork, Teamwork Desk, ConnectWise, ClickUp, Zoom, Slack, Discord, WAPA
- Hosting & Light DevOps: Docker, AWS, DigitalOcean, Linux VPS Administration, Render, GitHub Actions & Version Control

TECHNICAL WORK EXPERIENCE

AI & Automation Engineer — AI MicroMind (2024 – 2026)

- Built and co-built 30+ native integration nodes directly in AI MicroMind Core for WAPA (WhatsApp API), Telegram, Gmail, Weather, MCP Client, Pinecone, Webhooks, Schedulers, and PostgreSQL Audit Loggers using AI tools (Antigravity, Claude Code, Codex).
- Architected and deployed the AI MicroMind App featuring the Rebot Bot Framework and Advanced BI & Reporting Tools. Enabled enterprise users to ask natural language questions directly to AI agents to extract live operational insights from on-premise ERPs (Oracle, Microsoft Dynamics, SAP, Odoo, SQL) and cloud platforms (Oracle Fusion, Dynamics 365 OData).
- Engineered full-stack mobile applications (front-end & back-end) and built AI MicroMind MicroApps, creating modular bridges to integrate third-party applications seamlessly into the MicroMind ecosystem.
- Developed custom integration applications and automated workflows across Lark Suite, Bubble.io, Teamwork, Teamwork Desk, ConnectWise, ClickUp, Zoom, Slack, Discord, Telegram, Facebook Messenger, and WAPA.
- Built complex multi-agent graphs using LangChain (Expert) and LangGraph (Advanced), implementing Model Context Protocol (MCP) server dispatchers that execute Node.js backend scripts safely via Claude prompts.
- Managed containerization, deployment, and cloud infrastructure across AWS, Docker, DigitalOcean, Linux VPS, Render, and GitHub.

Automation Engineer — Operatives (IT Services) (Jun 2021 – Jan 2022)

- Analyzed cross-departmental operational cycles and engineered end-to-end automated workflows, eliminating manual data entry bottlenecks across IT operations teams.

Operation Engineer & Admin — Operatives (IT Services) (Jan 2020 – Jun 2021)

- Managed IT infrastructure operations, monitored workflow execution logs, enforced SLA compliance, and administered operational tracking systems.

DETAILED PROJECT ARCHITECTURE HIGHLIGHTS

- AI MicroMind App & Rebot Bot Framework: Conversational BI reporting engine over Oracle, SAP, Microsoft Dynamics, Odoo, and Dynamics 365 OData.
- AI MicroMind Core Node Architecture (30+ Built/Co-built Nodes): Native Node.js integrations for WAPA, Telegram, Gmail, Weather, MCP, Pinecone, Webhooks, and Schedulers.
- AI MicroMind MicroApps Ecosystem: Modular integration middleware linking any web or mobile app into the central AI agent network.
- Full-Stack Mobile Application Development: Mobile frontend and backend APIs linked to AI agent execution chains.
- Multi-Agent Graphs with LangChain (Expert) & LangGraph (Advanced): Hierarchical supervisor agents with memory state routing.
- Pinecone Enterprise RAG Architecture: High-speed semantic document retrieval with context verification safeguards.
- DevOps & Hosting Suite: Containerized environments deployed on AWS, Docker, DigitalOcean VPS, Render, and GitHub.

EDUCATION

B.Sc. in Computer Engineering — Faculty of Engineering Shoubra, Benha University

Location: Benha, Egypt | Specialization: Computer Systems Architecture, Database Management Systems, Software Engineering & AI Systems.
